# Comparison of operating income with the previous year

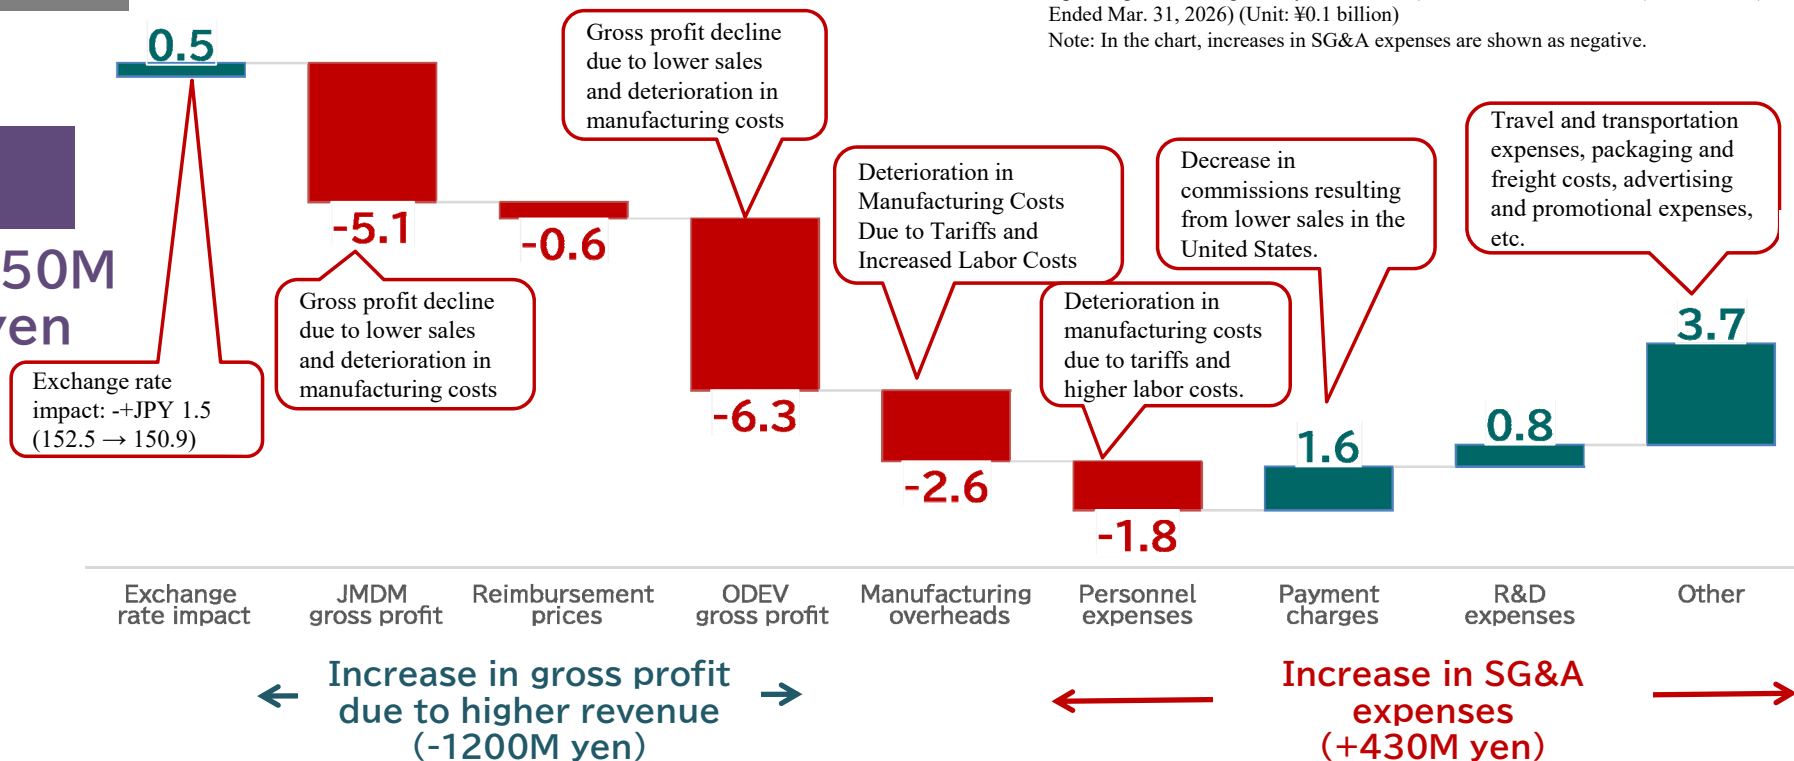

**Operating profit**  
**570M yen**

Operating profit declined from ¥1.55 billion in the previous fiscal year to ¥0.57 billion in the current fiscal year, a decrease of ¥0.98 billion year on year. The main factors behind this decline were as follows : Gross profit decreased by ¥1.20 billion due to lower sales in Japan and the U.S. Gross profit was further reduced by ¥0.26 billion due to higher manufacturing costs, including increased labor costs, manufacturing overhead related to production support, and higher procurement costs. On the other hand, selling, general and administrative expenses improved (decreased) by ¥0.43 billion year on year, driven by cost control initiatives despite increases in personnel expenses. This partially offset the negative impact on profit. However, the decline in gross profit and the deterioration in manufacturing costs outweighed these improvements, resulting in operating profit falling below the level of the previous year.

FY2025

1550M yen

Operating Profit Bridge Analysis: FY2025 (Year Ended Mar. 31, 2025) to FY2026 (Year Ended Mar. 31, 2026) (Unit: ¥0.1 billion)  
Note: In the chart, increases in SG&A expenses are shown as negative.

## Review

### ■ Full-Year Net Sales in Japan

- Due to a series of media reports, the number of cases acquired declined at certain hospitals, particularly from 4Q onward, resulting in a year-on-year decrease of ¥524 million (-3.8%).
- The impact on net sales from the reimbursement price reduction implemented in 2025 was ¥66 million (-0.5%) year on year.

# Key Results of Major Initiatives for FY2026 (Full Year)

	Region	Details of Initiatives
R&D		• Product Portfolio Review
		• Accelerate new product development to expand the product lineup
Manufacturing		• Reduce manufacturing costs by strengthening in-house production capacity • <b>Reduce costs and mitigate risks by strengthening procurement capabilities</b>
		• Start and scale manufacturing of China-made knee implants
		• Introduce Femoral Heads for THA
		• Expand net sales through focus products and new products • Launched new hip product “Ovation Tribute NEO Stem” • Strengthen the sales organization (reorganized into a business division structure effective Apr. 1)
Sales		• <b>Leverage new products to win new customers Nationwide U.S. rollout of the new hip product</b> • <b>“Trivicta Hip Stem”</b> Contributed to growth in the hip category
		• Expand sales of China-made knee implants

## SAICO Project: Status Update

Mitigating FX Risk and Reducing Procurement Costs

Fewer cases acquired due to media coverage, PHS/BKP growth

Strengthen specialization to maintain and expand the new customer base

P21

On Track

# SAICO Project : Status Update

## What is the SAICO Project?

An acronym for *Strategic Actionable Initiatives for Cost Optimization*.

This project was launched with the objective of reducing costs across our group by strengthening in-house manufacturing capabilities and enhancing procurement capabilities.

## 1.Reduce Costs and Mitigate Risks by Strengthening Procurement Capabilities

### Dual-sourcing (Multiple Suppliers)

At ODEV, we began outsourcing part of the manufacturing process to multiple suppliers.

- Promoted stabilization of ODEV’s manufacturing and supply capacity
- Achieved cost reductions for certain products
- Delivery delays for BKS Primary (knee) were resolved in December
- Delivery delays for BKS Revision (knee) continue, but normalization is expected in FY2027 Q2

## 2. Reduce Costs and Mitigate Risks by Strengthening Procurement Capabilities

### Procurement of China-made medical instruments (manufactured by WOMA)

A portion of the surgical instruments for the knee implant product “BKS TriMax”

- Part of the medical tools for BKS TriMax has begun to be shared/sourced from WOMA.
- This has achieved a 30% cost reduction compared to manufacturing in the U.S.
- The company is closely monitoring the impact of additional tariffs and is considering a review of its procurement strategy.

### Transfer of production to Asian regions, including Malaysia.

- The company is promoting the transfer of production of certain products sold in the Japanese market to the Asian region.
- This initiative aims to mitigate the risk of reciprocal tariffs imposed by the U.S.
- Preparations are also underway to establish a direct shipping scheme to Japan.

## SAICO Project : Status Update

### 3. Cost Reduction and Risk Mitigation through Enhanced Procurement Capabilities

Reduction in manufacturing costs through procurement from regions less affected by exchange rate fluctuations

Femoral head for artificial hip joints  
New product “JMDM BIOCERAM AZUL Ceramic Head” \*1

- A portion of flagship products has been shifted from U.S.-based procurement to domestic procurement in Japanese yen.
- This reduces foreign exchange risk and lowers procurement costs.
- A stable domestic sourcing framework has been established, contributing to improved profitability.

\*1 BIOCERAM AZUL is a registered trademark of Kyocera Corporation

# New Product Trivicta Hip Stem

With growing demand in the US market, we aim to acquire new customers by introducing this new product with a triple taper shape.

Triple Taper Stem

## 「Trivicta Hip Stem」

(Starting Sales in September 2024 at US market)

### Key Features of the New Product

- **A stem with a tapered shape featuring three flat surfaces.**
  - ➔ It is designed to be compatible with soft-tissue-preserving surgical techniques and is expected to fit a wide variety of patient-specific medullary canal geometries.
- **Sintered bead coating**
  - ➔ It promotes bone ingrowth within the beads and is expected to enhance long-term stable fixation.
- **Hydroxyapatite (HA) coating**
  - ➔ The HA coating is expected to promote biological fixation.

Sales across the U.S. have commenced from the 3rd quarter of the FYE March 2026.

Sales commenced in September 2024.  
The α launch is scheduled to conclude in October 2026, with 30 sets.

**As of March 2026, production has been increased to 70 sets.**

### Trivicta Sales

**Factors behind the deterioration in the cost of sales ratio: 40.9% (+3.2 pt YoY)**

Factors behind the deterioration in the cost of sales ratio

**Decline in sales due to supply constraints**

- ➔ Continued supply constraints for some key products, including BKS Revision
- ➔ Higher fixed cost burden due to lower sales volume

**Increase in labor and manufacturing overhead costs**

- ➔ Higher labor costs due to additional workforce to prioritize supply recovery
- ➔ Manufacturing overhead costs remaining elevated amid ongoing efficiency improvements in production

**Increase in procurement costs due to tariff impact**

- ➔ Impact of U.S. reciprocal tariffs: approximately ¥69 million

SAICO Project  
Structural reform to address key challenges

- Manufacturing cost improvement
- Expansion of in-house manufacturing
- Establishment of Asia-based sourcing and direct shipment scheme
- Improved profitability management by product
- Optimization of investment in medical instruments and inventory

- Supply stabilization
- Cost reduction
- Improvement of cost of sales ratio

## Factors behind the deterioration in the cost of sales ratio

**Cost of Sales Ratio**  
40.9%

The cost of sales ratio stood at 40.9%, representing a deterioration of 3.2 pt from 37.7% in the previous fiscal year. In JMDM (domestic operations), the decline was mainly driven by a lower share of in-house product sales. In ODEV (U.S. operations), the ratio worsened due to higher manufacturing costs as well as an increase in manufacturing overhead costs. Overall, these factors led to the deterioration in the cost of sales ratio.

## Strengthening of Compliance and Governance Framework

- In response to a series of reported incidents, a special committee was established to conduct a root cause analysis.

- Insufficient internal controls, checks and balances, and supervisory systems
- An evaluation system for the sales division that was overly focused on achieving sales targets
- An insufficiently developed corporate culture emphasizing compliance adherence

- Preventive Measures Under Implementation

- ① Expansion of legal and compliance functions
- ② Strengthening of compliance training and awareness programs
- ③ Enhancement of approval processes for interactions with healthcare professionals and related parties
- ④ Revision of the sales department's performance evaluation system
- ⑤ Suspension of dinners with healthcare professionals and scholarship donations
- ⑥ Promotion of the "KIZUNA" corporate culture reform project

### KIZUNA Project

Establishment and rollout of new behavioral principles to rebuild an organization capable of ensuring strict compliance and making autonomous, appropriate decisions

- ◆ Positioning compliance as the top management priority and focusing on restoring trust

## Results of sustainability initiatives

- GHG emissions (Scope 1 + 2) 1,444t, reduced by  $\Delta 525t$  ( $\Delta 27\%$ ) compared to the FYE March 2020
- CDP 2025 Ratings: Climate Change “B” and Water Security “B-” awarded

### Improving patient QOL

Strengthen product development and procurement capabilities for products and services that contribute to improving patient quality of life, thereby contributing to healthcare

- Number of market launch: 0 items
- Two educational programs for orthopedic surgeons conducted

### Promoting Diversification of Human Resources

Strengthening human capital management

- Talent management, global human resource development, and some initiatives to enhance engagement underway

### Reducing Environmental Impact

- Reduce GHG emissions (Scope 1 + 2) by  $\Delta 525t$  ( $\Delta 27\%$ ) compared to FYE March 2020
- CDP2025 survey on climate change, we received “B” rating, and in the survey on water security, we received “B-” rating.

### High Quality Response to Medical Needs

Stable supply of safe and reliable medical equipment

- No issues were identified during the ISO 13485 maintenance audit

### Respecting Human Rights

Respect for human rights based on the norms of the United Nations Global Compact (UNGC)

- Japan M.D.M. conducted a human rights due diligence for employees: No serious cases

### Promoting Corporate Governance

Compliance with the Corporate Governance Code

Promotion of risk management and compliance management

- Promotion of compliance education, including the subsidiary

## Major initiatives for the FYE March 2027

In FY2027, we aim to drive top-line growth through the nationwide expansion of Trivicta in the U.S., the launch of our China business, and the enhancement of specialized capabilities in Japan. At the same time, we will promote supply stabilization and cost reduction through stronger supplier management and the SAICO project.

	Region	Details of Initiatives
R&D		<ul style="list-style-type: none"> <li>Obtained regulatory approval for products in the artificial joint field (2 products)</li> <li>Expanded the product lineup through the launch of multiple products in the artificial joint field</li> </ul>
		<ul style="list-style-type: none"> <li><b>Strengthened contracts and supply management with key suppliers to prevent the recurrence of supply constraints and establish a stable supply system</b></li> <li><b>Reduced manufacturing costs through supplier diversification and other initiatives under the SAICO Project</b></li> <li>Obtained regulatory approval for China-made artificial hip joints and commenced local manufacturing</li> </ul>
Manufacturing		<ul style="list-style-type: none"> <li>Expansion of the procurement scope for medical instruments</li> </ul>
		<ul style="list-style-type: none"> <li><b>Maintain and strengthen the customer base through enhanced specialization under the divisional organizational structure</b></li> </ul>
Sales		<ul style="list-style-type: none"> <li><b>Expand sales through nationwide U.S. rollout of the new product “Trivicta Hip Stem”</b></li> <li>Strengthen new product education and sales capabilities through the National Sales Meeting</li> <li>Acquire new customers and recover procedure volumes among existing customers</li> </ul>
		<ul style="list-style-type: none"> <li>Expansion of sales of China-manufactured artificial knee joints</li> <li>Launch of sales of China-manufactured artificial hip products</li> </ul>

## Action Plan to Improve Profitability of the U.S. Business for the FYE March 2027

Achieve both revenue growth and profitability improvement through expansion of new product sales, recovery of procedure volumes for existing products, and supply stabilization

### Revenue Growth

- Expansion of New Product Sales
  - Accelerate growth in the hip replacement segment through additional investment in the new product “Trivicta Hip Stem”
  - Launch two orthopedic implant products (alpha launch)
- Supply Normalization
  - Resolve delivery delays for knee implant components and reduce stockouts and backorders
  - Review relationships with suppliers experiencing ongoing supply issues and strengthen a stable supply framework
- Recovery of Procedure Volumes for Existing Products
  - Expand procedure acquisition through additional investment in surgical instruments for the highly competitive Revision Knee segment
  - Utilize Revision Knee as a door opener to expand overall knee replacement market share

### Profitability Improvement

- Reduction of Manufacturing Costs
- Reduce manufacturing costs through initiatives under the SAICO Project
  - Promote in-house production
  - Improve manufacturing efficiency
- Inventory Optimization
  - Improve inventory turnover
  - Review supply agreements with key suppliers for major products to establish a stable supply system
- SG&A Efficiency Improvement
  - Enhance SG&A efficiency through rigorous ROI management
  - Review fixed costs and promotional expenses on a zero-based approach

## Trends in Capital Expenditures, etc.

**Growth investment in surgical instruments to drive increased procedure adoption of the new product “ Trivicta ”**

# Key Strategic Initiatives for the Domestic Business Toward Achieving FYE March 2029 Targets

FY Ending March 2027 – FY Ending March 2029

Aim to restore domestic revenue and profitability through enhanced specialization, new product introductions, SG&A efficiency improvements, and strengthened governance

FYE2029

## Domestic sales recovery

Domestic sales: ¥14,500 million

To restore domestic sales through continuous strengthening of expertise and introduction of new products in growth areas

Deepening of divisional structure

- Strengthen expertise and proposal capabilities by therapeutic area
- Enhance education and promotional initiatives
- Promote market share expansion at existing accounts and acquisition of new customers

Introduction of new products in growth areas

- Launch new products in the HIP Fracture segment
- Expand the product portfolio in chronic disease and trauma-related areas
- Increase the number of applicable surgical cases through improvements to instruments for existing flagship products

Improve profitability through optimized SG&A management and enhanced operational efficiency leveraging AI

## Improvement of profitability

SG&A Ratio Improvement

Operating Margin Improvement

**Effective Review of SG&A Expenses**

- Strengthen governance over business entertainment expenses and scholarship donations
- Optimize investment allocation based on product-level profitability
- Improve profitability through the review of transaction and contract terms

**Promotion of Operational Efficiency Through AI Utilization**

- Apply AI to inventory management, order processing, and sales management
- Improve efficiency in sales support and preparation of sales materials
- Reduce routine administrative tasks and shift resources toward higher value-added activities

Strengthening the domestic governance foundation to support trust recovery and sustainable growth

## Strengthened governance framework

Strict Compliance Adherence

Enhancement of legal and compliance functions

- Expand legal and compliance personnel
- Strengthen prior review of initiatives for medical institutions and healthcare professionals
- Reinforce employee training and internal consultation systems

Advanced business management

- Regular review of profitability by business and product
- Accelerate early identification of risk cases and reporting to management
- Enhance KPI management to improve execution capability

# Key Strategic Initiatives for the U.S. Business Toward Achieving FYE 2029 Targets

FY Ending March 2027 – FY Ending March 2029

The U.S. business aims to achieve both growth and profitability improvement through expansion of new product sales, cost reduction initiatives, and strengthening of the supply system.

**FYE2029**

**Growth of U.S. Revenue**

Revenue: US\$ 100 million

Reaccelerate U.S. revenue growth through recovery of procedure volumes among existing customers and introduction of new products

**Strengthening the Existing Business**

- Expand overall knee implant market share, leveraging BKSR and new product introductions as growth drivers
- Strengthen sales channels through initiatives such as nationwide distributor meetings

**New Product Introduction**

- Sequential launch of four new orthopedic implant products

**Profitability and Cash Improvement**

Improvement of operating profit margin	Improvement of free cash flow
--	-------------------------------

Improve profitability and cash generation through cost reduction and inventory optimization

**SAICO Project**

- Promote manufacturing cost reduction, expansion of in-house production, and procurement improvements
- Advance refund procedures to recover additional U.S. tariffs already paid

**Inventory Optimization**

- Improve inventory turnover through strengthened inventory management
- Enhance alignment between demand forecasting and supply planning to reduce excess inventory and stockouts

**Operational Strengthening**

Reinforcement of a stable supply system

Strengthen the operational foundation supporting growth and profitability

**Supplier Collaboration Enhancement Measures**

- Promote VMI (Vendor Managed Inventory) agreements with key suppliers to ensure supply stability
- Improve delivery performance and reduce supply constraint risks to enhance OTD (On-Time Delivery) performance

**Strengthening the S&OP Framework**

- Enhance integration among demand forecasting, sales planning, and production and procurement planning
- Promote expansion of in-house production

## Measures to Address Non-Compliance with TSE Prime Market Listing Requirements

- The Company currently falls below the TSE Prime Market listing maintenance requirement of JPY 10 billion in tradable share market capitalization, and is therefore in a state of non-compliance. The Company is required to exceed this standard within the improvement period from April 1, 2026 to March 31, 2027.

### ◆ The Company will prepare an application for listing on the TSE Standard Market.

Taking into account the uncertainty regarding whether the Prime Market listing criteria can be fully satisfied within the improvement period, the Company has decided to proceed with preparations for an application to the TSE Standard Market in order to enhance the certainty of maintaining its listing.

1. While continuing initiatives aimed at meeting the Prime Market listing criteria within the improvement period,
2. the Company will simultaneously proceed with preparations required for an application to the Standard Market and will disclose its policy and progress at an appropriate timing.

Criteria	Standard	Prime
Number of Shareholders	400 or more shareholders	800 or more shareholders
Number of Tradable Shares	2,000 Trading Units	20,000 Trading Units
Tradable Share Market Capitalization	JPY 1 billion or more	JPY 10 billion or more
Tradable Share Ratio	25% or more	35% or more
